

# DURAWELD 250P Ac/Dc

Automation AIXZGLOBAL AIXZ ACDC TIG Aluminum Welding Machine AIT250P ACDC

\*\* Synergic Control MIG Function allows the automatic change of the voltage & wire feeding speed by adjusting the amperage or choosing different thicknesses. It will match the welding chart set in the data. making it extremely easy for your welding works

\* MMA/ARC Stick : Hot start function make the arc ignition in MMA welding easier and avoid adhesion. The arc force up to 200A current obviously improve the performance of the machine in long-cable welding. Ability to use up to 165 feet (50 meters) leads without any power loss at the weld

\* Lift Tig: For welding with higher requirements, the lift-tig mode is recommended. to use this process, you will need to purchase the appropriate torch, regulator, hose, tungsten electrodes and gas separately (available in our shop)

## Specification

Item	value
Max. Load Power Capacity	7.0KVA
Output Polarity	AC/DC TIG
Rated Duty Cycle @40°C (TIG)	60%
Material / Metal Processed	Carbon steel, stainless steel, Aluminium alloy
Rated Input Voltage	220V
Condition	New
Place of Origin	Shenzhen China
Warranty	1 Year
Key Selling Points	Easy to Operate
Weight (KG)	13KG
Applicable Industries	Hotels, Garment Shops, Building Material Shops, Machinery Repair Shops
Feature	INVERTER
Rated Output Current (TIG)	180A
Rated Output Voltage (TIG)	25V
Input Voltage (V)	220V±15%
Frequency	50/60Hz
Output Current Range(A)	10-200A
Power factor	0.73
Efficiency	80%
Rated Duty Cycle	60%
No-load voltage (V)	55V
Insulation class	F
