

# Professional 220

## Features & Benefits

- Portable and durable
- Simple single-phase design
- Lever function
- High-quality steel welding tips
- Comes with replacement tips
- Quickly welds different types of materials

## Product Details

- Single phase design for welding different materials quickly and easily
- Simple lever function for applying pressure and performing welding applications
- Durable welding tips made of high-quality steel for perfect welds on various thickness materials
- Comes with replacement pair of welding tips for multiple uses
- Portable design with attached handle for easy transportation to different job locations

Introducing the Professional Spot Welder 220V Electric Single Phase Portable Handheld Welding Tip Gun. This powerful and versatile spot welder is the perfect tool for any welding application. Designed with a single phase design, this spot welder allows you to easily weld together different types of materials.

No need for complicated setups or adjustments. Simply insert the materials and press to weld, thanks to its simple lever function. Constructed from high-quality steel, the durable welding tips ensure a perfect weld every time, even for materials with varying thicknesses.

Plus, with the included extra pair of welding tips, you have peace of mind knowing that you are always ready for multiple uses. When it's time to replace the tips, simply twist them off and screw on the new ones. With its portable design and attached handle, this spot welder allows you to quickly transport it to different job locations. From automotive repairs to industrial projects, the Professional 220 Spot Welder is your go-to tool for all your spot welding needs. Don't settle for anything less than professional-grade results

Output Voltage	Input Voltage	Maximum Welding Current	Double-sided Welding Thickness	Working Mode	Package Size	Weight
1.6V	220V	8000A	0.6~1.5mm	Single spot welding	58x15x24cm	15kg
